

Floorkote

Floorkote is an acrylic modified base coat sealed with an epoxy topping. For use on general purpose and heavy-duty industrial floors. It provides the basic industrial and commercial application where a high abrasion and chemical resistant surface coating is required. Floorkote can be applied onto concrete, wood or steel surfaces, provided routine surface preparation is done.

Features:

Excellent resistance to surface wear
Chemical resistant
Outstanding colour stability
Easy application
High bond strength

Requirement	Test Method	Performance
Impact Resistance	MIL-D-3134F Sec. 4.7.7	Withstands 16ft/lb, no cracking, detamination or chipping
Indentation	MIL-D-31347F Sec. 4.7.4	Withstands 2000lbs/sq in. for 30mins without indentation
Abrasion Resistance	CS17 wheels with 1000 grams load on each arm for 10,000 cycles	0.030 grams loss per 1000 cycleH
Water Absorption	ASTM D-670-63 (24 hr. immersion)	10% maximum
Hardness (shore D)	ASTM D-2240	75 - 80
